

**Don't take Positive, Encouraging KLOVE off the air!**

**How KLOVE serves our family as a resident of the local community:**

KLOVE has served our family by informing us of relevant world news in addition to community-building regional events that we can participate in and/or attend. The news they share has kept us up-to-date with major world tragedies, while still including local events our family is interested in. The family-friendly (and most importantly *appropriate*) deejays give insight to the world's events and how we as a family can pray, assist and serve those who are enduring the many disasters our world has seen in recent years.

The music, of course, is a HUGE encouragement to our family because we can depend on the quality of the music and the bands' integrity (who will become role models someday to our children).  
we ONLY listen to KLOVE.

**The effect on the local community if KLOVE were to be displaced by an LPFM broadcaster providing other programming:**

Replacing KLOVE with any other music or programming would greatly damage the network of families and communities that have come to depend on the wholesome programming KLOVE offers. KLOVE is more than just a music channel- the news and updates it offers greatly impacts our community's ability to support its residents, and those in the nation. Locally, KLOVE has opened the door for several families' lives to be dramatically changed by the love and support of their community for them. It is more than just a church-people channel- it affects everyone.

In one non-Christian doctor's office KLOVE is played when the office is having a stressful day. The doctor says the "faith music" helps to bring peace to his day. This channel has that kind of affect!

**Why do you believe that the service provided by KLOVE is in the public interest:**

The music, news, and encouraging commentary of KLOVE is in the nation's interest. The programming is impactful- it is an avenue of great growth for families and communities as they listen to a hopeful message of care and love. Our nation needs to be reminded that the world is not just full of terror or fear. Mainstream programming cannot and does not provide hope because it communicates a message of unknown tragedy that is nearer and nearer. Mainstream bands capitalize on terror, fear, hate and anger. Keep KLOVE on the air and allow the hundreds of thousands of people it reaches be touched with a message of hope and encouragement.
